## PhD Student / Postdoc opportunities Genomic Damage in Lymphoma

---

Positions are available for PhD Student and Postdoctoral level candidates for studies of DNA damage in B lymphocyte cancers (lymphomas). The successful candidate will be part of a small team working at the interface of immunology and cancer. The role involves development of novel techniques and mouse lymphoma models. Experience in molecular biology required, familiarity with next-generation sequencing and computer programming desired but not required. See Robbiani et al, Cell 2015, Rommel et al, J Exp Med 2017 and Wang et al, J Exp Med 2017. Positions available starting as early as in January of 2021. Please send CV with name of 2 references.
